ABOUT ME

I am a student with a passion for software development. From an early age, I found a keen interest in computers and programming. I taught myself to code and have been developing software ever since. I used my skills to develop bespoke solutions in the finance industry, which saved hundreds of billable hours. I am currently pursuing an honours degree in Computer Science at the University of Cape Town.

I enjoy working in a team environment, with a focus on team collaboration and communication. I am always eager to learn new technologies and improve my skills. I am looking for an opportunity to work in a challenging environment where I can grow as a developer and contribute to the success of the company, while also learning from my peers.

WORK EXPERIENCE

2019 - 2020
1 Year

SOFTWARE DEVELOPER
Three Address Code / Sandton City

I was hired at Three Address Code to develop software solutions as a contractor for the company. I was tasked with a client, Nitrogen, a hedge fund management company.

I created internal automation tooling, including an automated reconciliation platform, and I evolved the company's existing trade allocation software to be a more efficient and accurate system. I also developed various tools such as a profit and loss tracker, PDF parsers and an automated email suite that saved the company hundreds of billable hours. The software was developed using Python, VBA and Bash/Batch
